

As a result of your generosity, the foundation was able to make the following donations this year:

LEARNING ALLY

The foundation will continue to provide **Learning Ally** Audiobook solutions to every child in need of this accommodation at the following schools:

→ **The Archdiocese of Denver Grade Schools & High Schools**
→ **Brush School District**
→ **Valley School District in Sterling, Colorado**
→ **Mullen High School**
→ **Humanex Academy**

CLASSROOM RESOURCES

The students and teachers at the following schools will receive these classroom resources:

Humanex Academy will receive funds for multisensory classroom materials to help support learning disabled students with day-to-day learning.

The foundation will also provide funds for seminar classes for juniors and seniors at **Humanex Academy** to help them prepare for post-secondary life. They will receive instruction and materials designed to help students with learning disabilities strengthen their self-advocacy, executive functioning, and life skills. The seminars will also help students navigate the transition from high school to college or a work environment.

The students at **Havern School** will soon enjoy a brand-new **STEAM Makerspace**! This space will give students the opportunity to explore hands-on activities and design challenges that integrate science, technology, engineering, art, and math. The space will help students build skills such as problem solving, creative thinking, and collaboration.

TEACHER TRAININGS:

For a second year in a row, the foundation will provide 10 scholarships for teachers to attend Marilyn Zecher's Multisensory Math Training at **Hillside School** in Boulder. This 5-day course applies the principles of the Orton-Gillingham methodology to transform math instruction into true math intervention.

The foundation will provide funds for cross-training between the teachers and staff at **Hillside School** in Boulder and coaches at Untapped Learning. The training sessions will bridge the gap between academic instruction and executive functioning skills and focus on how the two are interwoven in day-to-day activities inside and outside of the classroom.

The math teachers at **Humanex Academy** will continue their professional development classes, which are focused on teaching neurodivergent learners with the following learning challenges: dyscalculia, executive functioning skill deficits, and math anxiety.

SCHOLARSHIPS

The foundation will provide scholarships for dyslexic students to attend **Rocky Mountain Camp AND Durango Mountain Camp** during the summer of 2026!

DIAGNOSTIC TESTING

The Zarlengo Foundation continues to provide funds to the **Zarlengo Foundation Learning Evaluation Center** to provide diagnostic testing for struggling students in Colorado.

In addition to the test results parents receive from the LEC, the psychologists also provide students with a one-page information sheet highlighting their strengths and weaknesses, which helps students learn how to self-advocate in school.
